

Hospital TV UN672M Series

UL-Listed Hospital TV

* All images in this datasheet are for illustrative purposes only.

UN672M Series

Screen Size	55" / 50" / 43"
Stand Type	No Stand
Resolution	3,840 × 2,160 (UHD)
Front Color	Ashed Blue
Broadcasting	ATSC, Clear QAM, Analog NTSC
Speakers	10 W + 10 W
Solution	Pro:Centric (Smart, Cloud, Direct, V)

Pillow Speaker Ready

The hospital TV is equipped with a compatible pillow speaker* interface, giving patients the ability to control the TV sound and video from their bed.

* Pillow speaker is not provided by LG. (sold separately)

Nurse Call System Ready

Through nurse call system provided by a pillow speaker* connected to LG hospital TV, staff can be called immediately for emergency.

UL Hospital Grade Listed

The hospital TV is designed for the healthcare and hospital environment meeting UL safety standards.

Slim Depth for a Sleek Look

With a slimmer* design, the UN672M series integrates smoothly into hospital interiors.

* Compared to LG's previous hospital TV UT672M series

Embedded b-LAN

Hospital TV supports embedded *b*-LAN™, enabling PPV (Pay Per View) and VOD service without the need for a set-top box.

USB Cloning

USB data cloning makes managing multiple displays easy. Instead of setting up each display one by one, data can be copied to a USB* for one display, and be sent to the other displays through a USB plug-in.

* USB is not provided by LG. (sold separately)

Multi-code IR

Multi-code IR* function eliminates any remote-control signal interaction between multiple TVs in one place. LG hospital TV supports this when used with the Multi-code IR remote control, so users can freely control their own TVs without disturbing the others.

* Multi-code IR remote control is not provided by LG. (sold separately)

Pro:Centric Hospital Management Solution

The hospital content management solution Pro:Centric Direct offers easy and simple editing tools, making it easy to perform service and IP network-based remote management. The Pro:Centric Direct solution enables system integrators to edit their interface easily by providing customized interface and efficiently manages all LG hospital TVs in the hospital.

* Pro:Centric Direct solution is sold separately. Some features may not be supported based on PCD versions.

Voice Recognition Ready

For seamless interaction and user satisfaction, LG has applied voice recognition function to the UN672M series hospital TV. This feature makes it easy to control the TV without pressing the button of remote controls.

* Magic Motion Remote is required. (sold separately)

Pro:Idiom

The UN672M series provides embedded Pro:Idiom decryption, unlocking access to high-value digital content with Pro:Idiom DRM (Digital Right Management) which prevents illegal copying of the content.
